### Descripción

Di questi tempi non si fa altro che parlare di verde. L'impatto ambientale è uno degli argomenti che più di ogni altro interessa e appassiona chi si occupa di architettura. In effetti l'architettura residenziale è quella che consuma maggiormente le risorse naturali e l'emissione dei gas dovuti a riscaldamento, aria condizionata e altro è senz'altro responsabile dell'inquinamento ambientale. Fino a non molto tempo fa costruire ecocompatibilmente significava dare anche all'aspetto estetico una connotazione ben precisa. Oggi invece quello che maggiormente conta è che si arrivi a progetti veramente dalla parte della natura. In questo libro tutta una serie di progetti di architetti famosi e non.
